Objective

I am a sophomore Engineering student in B.Tech specializing in Cyber-Security, with a focus on applying knowledge through innovative projects. I possess strong programming skills, including hands-on experience in network scanning and SIEM analysis. With introductory experience in Cyber-Security projects, I aspire to contribute my skills in an exciting entry-level role while continuing to grow professionally.

Technical Skills

Languages: C/C++, Python, Java

Security & Networks: Nmap, Wireshark, OpenVAS, UFW, iptables, Scapy, Wazuh, ELK

Frameworks & Libraries: Next.js, React, Node.js, Flask

Platform: Docker, Cisco Packet Tracer, Vercel, Render, Git, VirtualBox

Database: MySQL, PostgreSQL, MongoDB

Internship

Cyber-Security Intern

22 Jun 2026 – 3 Jul 2026

ISRO ISSDC, Bangalore, India

Offline

- Proposed an architecture on an “AI assisted Zero Trust Cyber Resilient Science Data Center”.
- Studied, implemented and analyzed SIEMs and their data collected in an isolated test server.

Cyber-Security Intern

Feb 2026 – March 2026

Elevate Labs, India

Online

- Performed Network Scanning and Vulnerability assessments using Nmap, Wireshark, UFW and OpenVAS.
- Developed “NetSentinel”, which detects network anomalies like SYN flood and Port Scans, using packet inspection.

Projects

Home CyberSecurity Lab | Docker, Debian Netinst, Virtual Box

- Designed a lightweight Cybersecurity Lab using Docker and Virtualization tech with tools such as Kali, Debian and Wazuh.
- Enables real-time log collection and threat detection within an isolated network environment.

NetSentinel | Scapy, Rich, Python

- Developed a real-time network monitoring tool that detects network anomalies such as SYN flood and Port Scans using Scapy.
- Built a terminal-based alert dashboard using Rich for structured visualization of network anomalies, analyzing over 10,000 packets in a duration of 60 seconds.

Certifications

NPTEL Cyber Security and Privacy

Oct 2025

IIT Madras

Education

Vellore Institute of Technology

Chennai, India

Pursuing 5th Semester Computer Science – Cyber Security (CGPA – 8.50 upto 4th semester)

Aug 2024–Jul 2028

The PSBB Millennium School

Cuddalore, India

Higher and Senior Secondary Education – PCM + CS (12th – 88.6%)

Jun 2018-Mar 2024

Extra-Curricular Activities

ACM Student Chapter (ACMSC), Vellore Institute of Technology, Chennai

- Coordinated “Server-Surfers” (Kaspersky KIPS) and a follow-up CTF, contributing to challenge design and execution.
- Maintain the student chapter’s official website, ensuring regular updates and reliability.
